Education

Gokaraju Rangaraju Institute of Engineering and Technology Hyderabad, Telangana
Bachelor of Technology in Computer Science and Engineering *2024 – 2028*

Experience

Software Engineering Intern Jul. 2026 – Aug. 2026
RHYM Technologies LLP *Hyderabad, Telangana*
- Developed and maintained the CAP cybersecurity compliance platform using React.js, Node.js, MongoDB, and AWS, while fixing defects identified through system testing.
- Implemented audit-trial functionality, session persistence across page navigation, and assessment-level approval/rejection summaries for compliance workflows.
- Enhanced platform UI and usability across key workflows to improve the overall user experience.

Assistant Manager – Accounting & Assets Aug. 2025 – Present
Advanced Academic Centre (AAC), GRIET *Hyderabad, Telangana*
- Managed financial records, asset tracking, and expense coordination for club activities and technical events.
- Coordinated junior project teams and contributed to technical events through project tracking, sponsorship outreach, logistics, and cross-team communication.

Projects

ORCA – Marine Ecosystem Reasoning with Collaborative Agents | *Python, FastAPI, LangGraph, React, TypeScript*
- Built an agentic AI platform combining live weather, oceanographic, geospatial, and marine advisory data to answer coastal safety and navigation queries.
- Designed a LangGraph multi-agent pipeline with planner, specialist, risk, visualization, and explainability agents for parallel data retrieval and evidence-based responses.
- Implemented deterministic Go/Caution/No-Go safety scoring using wind, wave, tide, geofence, and marine-condition signals with GeoPandas, Shapely, and pyproj.

MESHLINE | *TypeScript, React, Vite, IndexedDB, WebRTC, Leaflet.js*
- Built a serverless Progressive Web App for decentralized peer-to-peer communication and local-first information sharing during network disruptions.
- Implemented gossip-based multi-hop data propagation, offline persistence with IndexedDB, and crowdsourced safety mapping with Leaflet.js.

GST Filing Agent | *Python, Streamlit, OCR, Gemini Vision API*
- Built an AI-powered Micro-SaaS that converts invoice images into GSTR-1 draft files, automating GST data extraction for small businesses.
- Developed an OCR + Gemini Vision pipeline to extract GSTIN, invoice details, HSN codes, tax values, and line items with automated B2B/B2C classification and CSV generation.

MedVault | *React.js, Node.js, Express.js, MongoDB*
- Built a secure medical record platform for organizing prescriptions, reports, medical documents, and health records.
- Implemented role-based access control with temporary, time-limited, and revocable permissions for controlled doctor access.

Technical Skills

Languages: Java, C, C++, Python, JavaScript, TypeScript, SQL
Web Technologies: HTML, CSS, React.js, Node.js, Express.js, FastAPI, Vite, REST APIs
AI / Data: LangGraph, Gemini API, Groq, OCR, NumPy, GeoPandas, Shapely, xarray
Databases: MongoDB, SQLite, IndexedDB
Developer Tools: Git, GitHub, Postman, Figma, VS Code
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
