## Education

|                                                                                                                                        |                                     |
|----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| <b>Gokaraju Rangaraju Institute of Engineering and Technology</b><br><i>Bachelor of Technology in Computer Science and Engineering</i> | Hyderabad, Telangana<br>2024 – 2028 |
|----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>Assistant Manager – Accounting &amp; Assets</b><br><i>Advanced Academic Centre (AAC), GRIET</i>                                                                                                                                                                                                                                                                                                                                                                                  | Aug. 2025 – Present<br>Hyderabad, Telangana |
| <ul style="list-style-type: none"><li>Managed financial records, registration accounting, asset tracking, and expense coordination for club activities and technical events.</li><li>Coordinated junior project teams by tracking progress and acting as the communication bridge between students, mentors, and club leadership.</li><li>Contributed to Project Expo and Opulence through financial operations, sponsorship outreach, logistics, and event coordination.</li></ul> |                                             |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>MESHLINE</b>   <i>TypeScript, React, Vite, IndexedDB, WebRTC, Leaflet.js</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 2026 |
| <ul style="list-style-type: none"><li>Built a serverless Progressive Web App enabling decentralized peer-to-peer communication and local-first information sharing during internet blackouts and network disruptions.</li><li>Implemented a gossip-based data propagation mechanism supporting multi-hop information relay across connected devices through intermediate peers.</li><li>Developed offline persistence using IndexedDB and crowdsourced safety mapping with Leaflet.js, including visual decay, compressed QR data drops, and a one-tap panic wipe.</li></ul> |      |
| <b>GST Filing Agent</b>   <i>Python, Streamlit, OCR, Gemini Vision API</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 2026 |
| <ul style="list-style-type: none"><li>Built a Micro-SaaS AI agent that converts invoice photos into GSTR-1 draft files, reducing manual GST data entry for small businesses.</li><li>Implemented an OCR + Gemini Vision pipeline to extract GSTIN, invoice details, HSN codes, tax values, and line items from invoice images.</li><li>Developed GSTR-1 classification logic for B2B/B2C invoices and generated filing-ready CSV exports automatically.</li></ul>                                                                                                            |      |
| <b>MedVault</b>   <i>React.js, Node.js, Express.js, MongoDB</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 2026 |
| <ul style="list-style-type: none"><li>Built a secure medical record platform allowing patients to digitally organize prescriptions, reports, medical documents, and health records.</li><li>Implemented role-based access control with temporary, time-limited, and revocable permissions for controlled doctor access to patient records.</li><li>Developed dedicated patient and doctor workflows for uploading, managing, and securely sharing medical records.</li></ul>                                                                                                 |      |
| <b>CodeClash</b>   <i>React.js, Node.js, Express.js, MongoDB</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 2025 |
| <ul style="list-style-type: none"><li>Developed a competitive frontend coding platform supporting timed HTML, CSS, and JavaScript challenges across multiple difficulty levels.</li><li>Implemented real-time leaderboards and dedicated host-participant workflows, allowing external hosts to create and manage coding contests.</li></ul>                                                                                                                                                                                                                                 |      |

## Technical Skills

**Languages:** Java, C, C++, Python, JavaScript, SQL  
**Web Technologies:** HTML, CSS, React.js, Node.js, Express.js, Vite  
**Databases:** MongoDB, SQL  
**Developer Tools:** Git, GitHub, Postman, Figma, VS Code  
**Core Concepts:** Data Structures & Algorithms, REST APIs, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
